

FIGURE 3
THE INHIBITORY EFFECT OF QUINIDINE ON THE METABOLISM OF 7.5 μ M OF CP-A
BY HUMAN LIVER MICROSOMES HL-1012

Figure 4
THE INHIBITORY EFFECT OF QUINIDINE ON CP- A METABOLISM IN HUMAN
LIVER MICROSOMES HL-1012

* As the rate of CP- A metabolism of CP- A min/nmole P450.

metabolism was linear up to 40 min incubation, the was expressed as $\mu\text{g CP- A metabolized}/40$
